

# The **NEW** fau-beamer Template

The  $\text{\LaTeX}$  template according to the 2021 FAU corporate guide

**Tim Roith**

Friedrich-Alexander Universität Erlangen-Nürnberg, Department Mathematik

June 9, 2022

## What is this?

---

This file demonstrates the `fau-beamer` style, which is a style for the  $\text{\LaTeX}$  `beamer` class, which allows to create presentation slides in  $\text{\LaTeX}$ . The design is based on the FAU corporate [style guide 2021](#).

This code for this template was written by [Tim Roith](#). If you have questions about the template or found a mistake you can send an email to `tim{dot}roith{at}fau{dot}de` or open a issue at the [GitHub repository](#).

Test

---

## 1. Example Section

### 1.1 Subsection A

### 1.2 Subsection B

## 2. The Color Scheme

## 3. The Frame Dimensions

## 4. Citing and bibliography

# 1. Example Section

1.1 Subsection A

1.2 Subsection B

## 2. The Color Scheme

## 3. The Frame Dimensions

## 4. Citing and bibliography

# An Example Slide

## With a subtitle

---

This is how a normal slide looks like, where plain text is put within the `frame` environment.

You can use blocks with this template.

## Block headline

This block spans all the way from the left to the right margin.

Using minipages one can use blocks of certain fixed sizes.

### Headline A

Some text.

### Headline B

Some other text  
that spans  
over multiple lines.

### Headline C

Even more text  
that spans  
over multiple lines.

# A very very very very very very very long title

---

---

In this frame everything is aligned on top.

In this frame everything is aligned on the bottom.

## Itemize and enumerate

---

You can use the itemize environment that looks as follows.

- An item.
- Another one.
  - A subitem.
  - Another subitem.
- And another item.

You can also use the enumerate environment.

1. The first item.
2. The second one.
3. The third one.

- The first item.

- The first item.
- The second one.

- The first item.
- The second one.

## Framed Text

This should be displayed after the list.

- The first item.
- The second one.

## Framed Text

This should be displayed after the list. This should be displayed last.

---

We can also have subsections

---

When there is one subsection, there probably should be another.

# 1. Example Section

1.1 Subsection A

1.2 Subsection B

## 2. The Color Scheme

## 3. The Frame Dimensions

## 4. Citing and bibliography

You can specify the institute template by passing it to package, i.e.,  
`\usepackage[institute=<option>]{styles/beamerthemefau}`,  
where you have the following options,

- FAU
- RW
- Med
- Nat
- TF

## Base and Dark scheme

---

For each institute the color scheme consists of two main colors, which are named `BaseColor` and `BaseDarkColor`. They can be used throughout the document. For each of these colors, adding a letter from A to D will create a lighter shade as displayed below.

# 1. Example Section

1.1 Subsection A

1.2 Subsection B

## 2. The Color Scheme

## 3. The Frame Dimensions

## 4. Citing and bibliography

# Text Area

The area you can fill in a normal frame

---

This area can be filled on a normal frame.

This area can be filled on a frame without a title.

This area can be filled on a plain frame.

This area can be filled on a true plain frame with removed margins.

# 1. Example Section

1.1 Subsection A

1.2 Subsection B

## 2. The Color Scheme

## 3. The Frame Dimensions

## 4. Citing and bibliography

Since we use `biblatex` we can easily cite our favourite articles, like [Bun+21a; Bun+21b]. For presentation the `footnote` command is useful to have citation at the bottom<sup>1</sup>.

---

<sup>1</sup>[Bun+21a]

To show the references used within this presentation we can use the `printbibliography` command from `biblatex`. For beamer documents it is important to give the additional option `[heading=none]`.
