

The NEW fau-beamer Template

The \LaTeX template according to the 2021 FAU corporate guide

Introduction

What is this?

This file demonstrates the fau-beamer style, which is a style for the \LaTeX beamer class, which allows to create presentation slides in \LaTeX . The design is based on the FAU corporate [style guide 2021](#).

This code for this template was written by [Tim Roith](#). If you have questions about the template or found a mistake you can send an email to `tim{dot}roith{at}fau{dot}de` or open a issue at the [GitHub repository](#).

An Example Slide

With a subtitle

This is how a normal slide looks like, where plain text is put within the `frame` environment.

You can use blocks with this template.

Block headline

This block spans all the way from the left to the right margin.

Using minipages one can use blocks of certain fixed sizes.

Headline A

Some text.

Headline B

Some other text
that spans
over multiple lines.

Headline C

Even more text
that spans
over multiple lines.

A block with an empty title.

A block with a space in the title.

Bottom aligned

FAU

In this frame everything is aligned on the bottom.

You can use the itemize environment that looks as follows.

- An item.
- Another one.
 - A subitem.
 - Another subitem.
- And another item.

You can also use the enumerate environment.

1. The first item.
2. The second one.
3. The third one.

Using Overlay Specifications

- The first item.

We can also have subsections, even though they don't really do anything right now. They only appear in the toc.

When there is one subsection, there probably should be another.

When there is one subsection, there probably should be another.

- 2. The Color Scheme
- 3. The Frame Dimensions
- 4. Equations and blocks
- 5. Citing and bibliography

Choosing the Institution

You can specify the institute template by passing it to package, i.e.,

```
\usepackage[institute=<option>]{styles/beamertthemefau},
```

where you have the following options,

- FAU
- RW
- Med
- Nat
- TF

You can specify the institute template by passing it to package, i.e.,
`\usepackage[institute=<option>]{styles/beamertthemefau},`
where you have the following options,

- FAU
- RW
- Med
- Nat
- TF

The Colors

Base and Dark scheme

For each institute the color scheme consists of two main colors, which are named BaseColor and BaseDarkColor. They can be used throughout the document. For each of theses colors, adding a letter from A to D will create a lighter shade as displayed below.

Equations

Label alignment

The beamer class unfortunately has some problems with the proper alignment of equation labels.

Equations

Label alignment

The beamer class unfortunately has some problems with the proper alignment of equation labels.
In this template we try to patch some of these issues and therefore the label below should be aligned exactly on the right margin

$$a^2 + b^2 = c^2.$$

(1)

An align environment should yield the same alignment

$$e^{i\pi} + 1 = 0.$$

(2)

This is especially important if we put such an environment in a block,

Gauss's Theorem

$$\int_{\Omega} \operatorname{div} F \, d\lambda^n = \int_{\partial\Omega} F \cdot \nu \, d\mathcal{H}^{n-1}.$$

5. Citing and bibliography

Since we use `biblatex` we can easily cite our favourite articles, like [[Bun+21a](#); [Bun+21b](#)]. For presentation the `footnote` command is useful to have citation at the bottom .

References

To show the references used within this presentation we can use the `printbibliography` command from `biblatex`. For beamer documents it is important to give the additional option `[heading=none]`.
